

Homeopathy a holistic system of medicine which stimulates the genes disease curing mechanism, to cure it self and restore the body to health. Homeopathy is the newest and advanced medical sciences which have gained popularity because of its promising results in treating what we say is incurable. Homeopathy is gentle, safe and cures permanently by stimulating and correcting the genetic faulty

person more weak and prone for new infection and complications. Homeopathy on the other hand studies the genetic expression at the level of Psyche-brain-body and also understand the mental cause (conflict) of why did the genes shift itself in a self destructive mode, through this study we are able to reverse the abnormal genetic process and restore the sick to health.

Diagnostic tools like MRIs, CT Scans,

caused due to microbes, but every disease is triggered due to a shock/conflict at the level of Psyche (which may go unnoticed) that triggers a biological process at a genetic level and thus gives rise to disease. In short, every disease has a particular conflict linked to it that has triggered a process which gives rise to disease."

When we suffer from asthma, tumors, cancers

HOMEOPATHY

STIMULATING GENES TO CURE ONESELF

mechanism of the person. Homeopathic medicines have a different mode of action; within them lays the power to stimulate the curing mechanism in genes, come what may be the disease condition!

VITANOVA Homeopathic Clinics has been treating the most difficult cases with Homeopathy after understanding patient's genes and their Genetic expressions.

To illustrate with examples, let us consider few medical conditions from the Homeopathic perspective:

Bronchial Asthma: Asthma is a result of spasmodic contraction of respiratory air passages. Spasm occurs due to bronchial hypersensitivity. Conventional system of medicine treats the condition with bronchodilators which counter act the spasm and give relief. This does not prevent further attacks of Asthma. In fact, subsequent attacks require higher doses of Bronchodilators as the body's resistance to effect of bronchodilators increases. Homeopathy aims at correcting this imbalance and consequently the Asthma attacks get less frequent, less intense and finally taper off to never appear again!

Tumor formation: Tumor/growths are a result of altered genetic defense of the body which is generally cut off, but to our surprise the tumor is cut only to be replaced again in the body. Homeopathy on the other hand tries to correct this genetic defense in the body and remove this tendency to tumor/growth formation.

Auto-immune diseases-(Cancers, Rheumatoid arthritis, Psoriasis, etc.): Here due to a sudden mental shock (conflict) the genes tries to defend it self by self destruction, i.e. the cells of the body start destroying its own cells, which is generally tried to be treated by the use of steroids or chemo's where they do suppress the immune system/ try to destroy the abnormal cells, which in the due course also destroy the healthy cells thus making the

person more weak and prone for new infection and complications. Homeopathy on the other hand studies the genetic expression at the level of Psyche-brain-body and also understand the mental cause (conflict) of why did the genes shift itself in a self destructive mode, through this study we are able to reverse the abnormal genetic process and restore the sick to health.

HOMEOPATHIC MEDICINES

A very commonly misunderstood concept in Homeopathy is regarding composition of Homeopathic medicines. The general notion is that the crude medicinal substance like plant, mineral, metal etc. is diluted to such an extent that there is no substance detectable in the medicine. In reality, this is only half the truth. Dr. Hahnemann, the Father of Homeopathy founded a method called Drug Dynamisation by which the quantity of substance is reduced and the quality of the substance is at the same time increased which provides it an ability to stimulate the genes if rightly selected. One needs to understand the concept of Memory of water to appreciate how Homeopathic medicines are made and how the medicinal properties of the substance are retained.

DISEASE AND HOMEOPATHY

Homeopathy is based on the principle Similia Similibus Curantur (Like Cures Like). It says that the medicine which can produce certain effects on a healthy individual is capable of curing any illness which displays similar effects. During drug proving on health human being the drug manifest its inert characters on the person, at the level of Psyche (mental characters), Brain and body (inflammatory-pathological level) which is noted and matched with the characters of the sick individual.

Dr. Silroy Martins say, "No disease in man is

etc., normally it is described as a disease. Homeopathy believes that they are not diseases but an expression of the internal disharmony, triggered by a conflict at the level of Psyche, which leads to disease. Through a detailed case history we try to understand this shock (conflict) and how his genes have behaved and expressed themselves to this event. Based on the individual's altered genetic expression at the level of Psyche-Brain-Organ, the single similar remedy that has the ability to produce the similar condition as in the sick is carefully chosen and prescribed for each individual case which is aimed to stimulate the body's genetics to repair itself, triggering a healing reaction at the level of Psyche-Brain-Organ thus harmonizes the internal disharmony and restoring health. This cure is only achieved when the prescribed remedy is similar to the genetic characters of the diseased

At VITANOVA Homeopathic Clinics, Doctors have been successfully treating patients suffering from deep pathologies like Cancers, Comas, Nerve and Joint complaints, Mental disorders, Thyroid disorders, Diabetes, Menstrual irregularities, Infertility, Respiratory disorders, etc. after studying the behavior and expression of genes in each individual case.

When everything seems impossible, all that's left; however impossible it may seem; it's possible! These words explain the mission and perseverance of Dr. Silroy Martins M.D, a homeopath, who says that homeopathy can treat even the most difficult and so called incurable cases.
