

HOMEOPATHY

THE BEST KNOWN MEDICINE

A HOPE FOR THE SO CALLED INCURABLES

VITANOVA CLINICS, uses Homeopathy to treat Autism, Arthritis, Cancers, Infertility, Menstrual problems, Multiple sclerosis, Psoriasis, Renal failures, Rheumatic disorders, Thyroid disorders, Vitiligo, etc. and states: Homeopathy treats the hopeless or the so called incurable!

It seems with each passing decade, the medical fraternity claims of being more advanced than before; but is it true? That which was incurable decades ago, is incurable today too. In today's world if we look around we find mankind suffering of more dreaded diseases than before, so how can we say we have better healthcare services? We find diseases which were rare in the past are more common today; we see autism, cancers, thyroid problems, menstrual abnormalities, genetic disorders and the list goes on and on....., we constantly ask our doctors, "what am I doing wrong? Why can't you cure me of my problem for life?" So the question is; where are we going wrong? Is it the inability of the doctor? Or is medicine still lacking behind?

When everything seems impossible, all that's left; however impossible it may seem; it's possible! These words explain the mission and perseverance of Dr. Silroy Martins M.D, a homeopath, who says that homeopathy can treat even the most difficult and so called incurable cases.

Dr. Silroy Martins M.D. and Dr. Dorland Martins M.D, come from an eminent family of physicians in Goa. Their family tree comprises of a string of four generations of physicians; and are the Great Grandsons of Goa's well known Physician, Dr. Santana Martins commonly known as Dr. Santanbab, who had started his practice to serve the people of Goa during the Portuguese regime. Dr. Silroy Martins and Dr. Dorland Martins graduated and received their Masters degree in homeopathy, which according to them, is the science to treat the so called incurables.

As homeopathy was discovered in the 19th century, back then it was difficult for people to comprehend its principles. But today with, better knowledge of genetics, embryology, pathology, etc., we are in a

better position to understand the principles of homeopathy in order to treat the so called incurables.

Dr. Martins says "Homeopathy treats the man in disease, not the disease in men. Every disease is a defense process and every doctor should understand this process and only direct this defense in a way that will restore health. What homeopathy actually does is, it stimulate genetics of a man so that he could start curing himself. Every human being has his own DNA mechanism which can cure every disease. This mechanism is exactly what we at VITANOVA stimulate."

With any so called incurable/ curable disease, most of the medicinal therapies only try to control the symptoms of the disease, and not aim to cure, they do not

strive to know what is the actual cause, that gave rise to disease or why only this individual came up with such a sickness; Dr. Martins says every alteration of health in the individual (i.e. from harmony to disharmony) has a meaning, there's nothing that is meaningless, every sickness is a result of a conflict that triggers a defensive process which we call as disease and it is this disharmony that has to be understood and redirected to restore health.

Dr. Martins says homeopathic remedies can be made from anything e.g. Plants, minerals, metals, nosodes, animals etc., where these substance are proved on humans and information recorded. Every substance has its own unique information or energy that individualizes itself and has the ability to stimulate the genes to bring about cures, if rightly selected.

APPROACH AT VITANOVA CLINICS

"VITANOVA HOMEOPATHIC CLINICS takes the science of homeopathy to the next level by combining knowledge of modern day science of Genetic, embryology and other holistic sciences"

The Doctors at VITANOVA CLINICS have been successfully treating patients after studying the behavior and expression of genes in each individual case. We take a detailed case history of the patient where we ask the patient questions about their personality, experiences, physical and mental functions, reaction to situations, etc. through which we individualize the patient and also find the cause (conflict) that has triggered the genes to cause disease. We also look into the various investigations and try to understand how the genes of this individual are expressing itself in disease. The patient's history helps the Doctor to understand the individual's genetic expression on Psyche-Brain-Organ. After this, the remedy is carefully chosen with the help of latest techniques in Homeopathy which would stimulate the genes to repair at the level of Psyche-Brain-Organ - Says Dr. Dorland Martins M.D.

After the first prescription is done we then ask the patient to visit us once in 15 or 30 days (depending on the case) to see how the patient responded to the administered remedy. Sometimes we have to change the medicine or dosage depending on the prognosis of the case; once we are assured that the patient is on a right path to cure we see the patient once every month.

Dr. Martins emphasizes many diseases which may seem incurable, are actually treated through homeopathy. Some genetic anomalies can also be treated up to a particular phase.

"Our treatment module incorporates a unique 'Patient Empowerment Program' that educates the patients about the nature of their disease and the systematic progress of their condition towards restoration of health". He concludes saying, It is interesting to note that many of our patients experience this repair mechanism at a level above repairing of Psyche-Brain-Organ. They see its positive effects in their Personal and professional relationships too. It is thus a renaissance with Homeopathy, where Science meets Spirituality!
